

CARDPRESSO

THE ESSENTIAL CARD PERSONALIZATION SOFTWARE

Evolis Zenius, Primacy, Avansia and Quantum card printers are delivered with a cardPresso card designer software license, the ultimate tool for professional card design. cardPresso is user friendly and provides the best features and capabilities for the production of all types of badges, whatever your organization. You can upgrade whenever you want to one of our higher editions to benefit from great, professional features.

USER-FRIENDLY SOFTWARE

- cardPresso is designed to make card production easy. Graphic design and personalization tools are included, both in PC or Mac environments.
- Its user friendly interface, its built-in card templates and creation wizard allow anyone to use the software without much training.

ADVANCED FEATURES

- It works with large databases including MS Access, MS SQL, MySQL and Oracle. Database files in .xls, .xlsx, .csv and .txt formats are also natively supported.
- cardPresso allows encoding of magnetic stripe, contact and contactless chip cards.

FULL SUPPORT

- cardPresso provides help online, free and responsive technical support and continuous development to guarantee an application with the most up-to-date card technologies.
- The compatibility between your hardware and software equipment is ensured since all cardPresso editions are tested with Evolis card printers.

INCLUDED WITH EVOLIS PRINTERS

UPGRADE FOR EVEN MORE GREAT FEATURES!
